DETAILED ACTION

Allowable Subject Matter

Claims 1, 3-33, and 35-39 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claims 1, and 3-31, the prior art alone or in combination does not teach the limitations of a solid electrolytic capacitor comprising an anode terminal including a first thick portion and a first thin portion thinner than the first thick portion, the first thick portion having the second surface of the anode terminal and a portion of the first surface of the anode terminal, the first thin portion having a portion of the first surface of the anode terminal and being connected to the first thick portion, and a cathode terminal including a second thick portion and a second thin portion thinner than the second thick portion, the second thick portion having the second surface of the cathode terminal and a portion of the first surface of the cathode terminal, the second thin portion having a portion of the first surface and being connected to the second thick portion. With respect to claims 31-33, and 34-39, the prior art alone or in combination does not teach the limitation of a method of manufacturing a solid electrolytic capacitor comprising an anode terminal including a first thick portion and a first thin portion thinner than the first thick portion, the first thick portion having the second surface of the anode terminal and a portion of the first surface of the anode terminal, the first thin portion having a portion of the first surface of the anode terminal and being connected to the first thick portion, and a cathode terminal including a second thick portion and a second thin portion thinner than the second thick portion, the second thick portion having the

second surface of the cathode terminal and a portion of the first surface of the cathode terminal, the second thin portion having a portion of the first surface and being connected to the second thick portion.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Citation Relevant of Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. Kobayashi et al. (US 7,158,366) disclose solid electrolytic capacitor.
- b. Sawano (US 7,139,163) discloses a mold member packaging a capacitor.
- c. Sano et al. (US 7,135,754) disclose chip type solid electrolytic capacitor.
- d. Arai et al. (US 6,912,117) disclose solid electrolytic capacitor and method of manufacturing the same.
- e. Uzawa et al. (US 6,882,519) disclose flat aluminum electrolytic capacitor and method of manufacturing the same.
- f. Igaki et al. (US 6,552,896) disclose solid electrolytic capacitor and method for manufacturing the same.
- g. Fujimoto et al. (US 6,462,936) disclose solid electrolytic capacitor.
- h. Kojima et al. (US 5,424,907) disclose solid electrolytic having a dielectric film, with or without a conductive under laying layer.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nguyen T. Ha whose telephone number is 571-272-1974. The examiner can normally be reached on Monday-Friday from 8:30AM to 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Diego F. Gutierrez can be reached on 571-272-2245. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
